Your Safety is Our Top Priority

“Safety” is becoming an essential part in industrial automation, and the two parts are very closely associated. New safety standards have become mandatory in many industrial fields, to protect personnel from injury in potentially dangerous areas or situations. Automation technology is changing rapidly, with increased chance of injury from dangerous machinery.

Safety system can be applied in almost all industrial fields where people and machines must co-exist. By implementing safety systems, companies can ensure safe environments for workers, reduce costs from health risks and increase work efficiency. Safety system is no longer a choice to make, it has become an essential requirement.

Autonics is proud to introduce various safety products to ensure safety in industrial sites. With automation technology and expertise which we have built for over 40 years, we now present new safety products that will protect you and your equipment.

Autonics safety solution promises to keep you safe and raise workplace efficiency with stable, reliable, flexible, and practical safety products and systems.

Stay Safe Anywhere with Various Autonics Safety Products and Solutions

Safety is a top concern in industries where personnel and machines must work together. As a partner to keep you and your machines safe, Autonics offers various safety technology and solutions.

Autonics safety products feature high flexibility and practicality, with various product options and functions that can be applied in various different environments. Our products are developed to meet customer needs and demands in the industry and also to increase workplace efficiency.

With Autonics safety solutions, you can minimize various risks and prevent accidents by analyzing environmental and operational settings. Ensure peace of mind at your operation sites by choosing Autonics safety products. We will keep you safe.

Light the Way to Your Safety

Safety Light Curtains

SFL/SFLA Series

Safety light curtains are installed in potentially dangerous or hazardous areas or machines to safeguard personnel from injury. Operation of potentially dangerous machines are turned off when an object or person is detected between the emitter and receiver. The light curtains feature proven technology from Autonics area sensors and mapping sensors. The light curtains are built to meet international safety standards and regulations. Various detection models and safety functions are available to protect your safety diverse applications.

Safety Standards

- IEC/EN 61508 (SIL 3)
- IEC/EN 62061 (SIL CL 3)
- EN/IEC 61496-1/2 (Type 4, A.O.P.D., E.S.P.E.)
- ISO 13849-1/2 (Cat. 4, PL e)

Certifications

Various Models Available for Flexible Applications

The SFL/SFLA series safety light curtains are available in various models for flexible application. The light curtains are available in various product heights, beam pitch size (9 mm/15 mm/25 mm) for installation in diverse environments. The light curtains can be expanded to 4 sets and 400 beams for application in larger scale industrial environments.

1. Various Detection Type Models

Finger detection, hand detection, hand-body detection models are available for application in diverse user environments.

Finger detection type

- Beam pitch : 9 mm
- Minimum detection size : Ø14 mm

Hand detection type

- Beam pitch : 15 mm
- Minimum detection size : Ø20 mm

Body detection type

- Beam pitch : 25 mm
- Minimum detection size : Ø30 mm

SFL Series (Standard Type)

	Finger	Hand	Body
Sensing distance (Long mode)	0.2 to 10 m	0.2 to 15 m	0.2 to 15 m
Detection capability	14 mm	20 mm	30 mm
Optical axis pitch	9 mm	15 mm	25 mm
Number of beams	15 to 111 ea	12 to 68 ea	42 to 75 ea
Protection height	144 to 1,008 mm	183 to 1,023 mm	1,043 to 1,868 mm

SFLA Series (High Performance Type)

	Finger	Hand	Body
Sensing distance (Long mode)	0.2 to 10 m	0.2 to 15 m	0.2 to 15 m
Detection capability	14 mm	20 mm	30 mm
Optical axis pitch	9 mm	15 mm	25 mm
Number of beams	15 to 199 ea	12 to 124 ea	9 to 75 ea
Protection height	144 to 1,800 mm	183 to 1,863 mm	218 to 1,868 mm

2. Various Protection Height

Various models are available by protection height (144 mm to 1,868 mm), offering options for diverse equipment sizes

1,868 mm

144 mm

3. Long Sensing Distance

Long sensing distance (15 m) allows wider area of detection. The sensors can be set to short/long mode depending on user needs.

- Short Mode: 0.2 to 5 m / 0.2 to 8 m
- Long Mode: 0.2 to 10 m / 0.2 to 15 m

High Durability and Environmental Performance

The SFL/SFLA series is designed with hardened casing and screen protection for application in harsh conditions. The light curtains can be installed in environments with impact, dust, or moisture.

1. Robust Body Housing

The robust body housing allows stable operation in harsh conditions with sudden impact.

2. Window Screen Protection

The narrow window screen with protection minimizes the chance of impact to the sensing areas.

3. IP65/67 Protection Rating

IP65/67 protection structure allows stable and error-free operation even in wet or dusty environments.

4. Expand up to 400 Beams

The SFLA series light curtains can be expanded up to 4 sets and 400 beams with serial expansion cables. Multiple light curtains can be controlled using a single connection line, offering easier wiring, installation, and design planning.

Also, the mutual interference protection ensures that there is no signal interference between the connected units. If an error is detected in a single unit, all connected units will enter into lockout state.

* SFL series: expand up to 3 sets and 300 beams

Serial Expansion Connection (SFLA Series)

- 1 Top beam indicator lights up top beam is received
- 2 Top control output indicator lights up or flashes depending on control output
- 3 Power/lockout indicator lights up when powered on
- 4 Bottom beam indicator lights up when bottom beam is received
- 5 Frequency indicator displays set frequency during mutual interference prevention
- 6 External test indicator lights up when external test signal is applied
- 7 Interlock indicator lights up when during interlock state
- 8 EDM indicator lights up with EDM input
- 9 NPN/PNP indicator lights up with NPN setting/turned off with PNP setting
- 10 Control output indicator green light when output ON, red light when output OFF
- 11 Status display indicates operation status

Easy Status Check with Indicators

The SFL/SFLA series is designed to provide a sense of safety to users. The large operation indicators offer minimal blind spots, and operators can easily check the status of the light curtains in real-time, ensuring safety of both personnel and machines.

1. Top Control Output Indicator

The top control output indicator shows various output status including output ON/OFF, muting/override status, lockout status etc. The indicator is located on the top corner of the unit, which make it highly visible from any angle.

2. Status Display

The 7-segment status display shows various operation status of the unit using alphabet or numbers. Users can check various status including error status, communication status, warning conditions, etc.

Status Display Description

Location	Operation	Display		Description
Emitter / Receiver	PC connection (download)	P	Flashing	Flashes when downloading the setting information.
	Communication error	⌵	Flashing	Flashes when RS485 communication error occurs.
	Error condition	E	Flashing	Flashes when entering the lockout condition.
	Warning condition	W	Flashing	Flashes when in a warning condition.
Emitter	Default condition	0	ON	Displays when function is deactivated.
	Blanking	b	ON	Displays when the blanking function is activated.
	Muting	m	ON	Displays when in the muting state.
	Override	o	ON	Displays when in the override state.
	Reset-hold	H	ON	Displays when waiting for reset-hold input.
	Reduced resolution	r	ON	Displays when the reduced resolution function is activated.
Receiver	Light incident	0-9	ON	Displays the sensitivity level of beams with the lowest light incident (0 to 9).

3. Beam Indicator

The LED beam indicator turns blue when the beam is received normally, and turns off when the light is blocked.

The LED turns red when ambient light is received. The indicator allows easy installation and setting, and also provides users with visual indication of errors.

1) Check Installation

The indicator can detect misalignment of emitter and receiver in real-time, allowing easier installation and setting.

- 1 Align the top beam
- 2 Align the bottom beam
- 3 If the LED indicator turns blue, the beams have been aligned normally.

2) Check Light Sensitivity

The sensitivity reduction alarm is activated if the amount of light received changes due to vibration, heating, distortion, or other factors preventing problems in advance.

* Light level over 30%: blue LED ON / light level over 15%: blue LED flashing / light level under 15%: blue LED OFF

3) Check Ambient Light

Ambient light alarm is activated if external ambient light is detected or if emitter/receiver operation timing is affected. (Ambient light algorithm)

Easy Installation

The SFL/SFLA series features easy installation.

Standard and adjustable brackets are available and can be installed on top, bottom, or middle of the units.

The adjustable brackets can be adjusted by 15 degrees to right or left for easier installation.

One-Touch Bracket

The push-to-install one-touch method allows easier installation.

Adjustable Brackets

The adjustable brackets can be adjusted by 15 degrees to right or left after installation for easier setting.

Brackets by Light Curtain Length

Brackets	Length	
	Max. 1 m	Min. 1 m
Top/Bottom adjustable bracket	Requires 2 brackets	Unavailable
Top/Bottom bracket		
Side adjustable bracket	Requires 2 brackets	Requires 3 brackets
Side bracket		

Safety Light Curtain Software, atLightCurtain

atLightCurtain is a dedicated software for SFL/SFLA series safety light curtains to monitor operation status and set functions. Users can set various safety-related functions including muting, blanking from the parameter menu and monitor various operation status including light amount, connection, and errors.

* Detailed settings and features may not be available on standard type SFL series.

1. User-Oriented Graphic Interface

The atLightCurtain software screen features ribbon menus with status display, monitoring, and setting screens. The intuitive icons and user-oriented interface allows even novice users to easily operate the software. The setting and monitoring screens can be expanded to show diverse range of information.

- 1 **Ribbon menu** main software functions
- 2 **Status display screen** product information and operation status
- 3 **Monitoring and setting screen** product connection and monitoring information, safety functions
- 4 **Monitoring** light level by beam, connection, errors/alarms, etc.
- 5 **Safety-related functions** model settings, muting, blanking, and other settings

2. Various Safety-Related Functions

Industrial settings vary greatly by size and type, and potential dangers can occur from various environmental factors. Users can set muting, blanking, and other safety-related functions on the SFLA series with the atLightCurtain software.

1) Reduced Resolution

Reduced resolution is a function for changing the detection capability of the light curtain. It prevents the control output from turning OFF when an object moving through the light curtain is smaller than the designated size. Reduced resolution can be set for all areas within the detection area, and up to 3 beams can be set to be ignored.

3) Blanking

Blanking function allows users to set selected beams blanking zones, preventing detection of objects in the blanking zone. This function can be used if an object or machine is located within the detection area, partially blocking some beams.

Blanking Function Types

Fixed Blanking	Used when an object or machine is continuously blocking certain beams.
Floating Blanking	Used when an fixed-sized object is moving. The blanking area changes with the moving object.

2) Muting

Muting function is a function to prevent the control output from turning OFF when an object is detected moving through the curtain. The light curtains can be set so that machines will stop operation only when a person is detected by muting the beams where objects may pass. The muting area can be set for the entire detection area or only for selected areas.

Muting Function Types

Standard Mode	Default muting function that starts and ends muting status by the set conditions.
Exit-Only Mode	Maintains muting status until object has completely cleared the area.

4) Override

Override function is used when the muting function ends and operation resumes, but the object is still within the detection area. The override function can be used to turn output ON to remove the object in the moving direction.

Light Curtain Selection Guide

Choose the correct light curtain model by following the directions below.

Step 1. Select model by purpose of use.

		SFL-EC7T	SFL-EC7R	7
		SFL-EC10T	SFL-EC10R	10
Lamp output cables		SFL-LC		3
USB/Serial communication converters		SCM-US		1.5
Converter cables		EXT-SFL		0.3

Step 3. Select installation brackets.

Type	Top/bottom brackets	Mid-area brackets
Adjustable type	Top/bottom adjustable brackets BK-SFL-TBA 	Mid-area adjustable brackets BK-SFL-SA 
Standard type	Top/bottom brackets BK-SFL-TBF 	Mid-area brackets BK-SFL-SF 

Light Curtains

SFL/SFLA Series

Technical Overview

Ordering Information

This is only for reference. For selecting the specific model, follow the Autonics web site.

- ❶ Type**
No-mark: Standard type
A: High performance type
- ❷ Detection capability**
14: Ø 14 mm, finger
20: Ø 20 mm, hand
30: Ø 30 mm, hand-body
- ❸ Number of optical axes**
Number: Number of optical axes

Dimensions

Unit: mm, For the detailed dimensions of the product, follow the Autonics web site. This dimension is based on the SFL(A) 14 model. The appearance varies depending on the detection capability.

01) When removing the end cap, there is the lamp output terminal (top) or the power supply terminal (bottom).
02) When removing the front cover, there is the setting switch (on the emitter and the receiver) or the PC communication port (on the receiver).

Detection capability	Models	Number of beams	A (protective height)	B (sensing height)	C (optical axis pitch)
Ø 14 mm (finger)	Standard	15 to 111	144 to 1,008	126 to 990	9
	Advanced	15 to 199	144 to 1,800	126 to 1,782	
Ø 20 mm (hand)	Standard	12 to 68	183 to 1,023	165 to 1,005	15
	Advanced	12 to 124	183 to 1,863	165 to 1,845	
Ø 30 mm (hand-body)	Standard	42 to 75	1,043 to 1,868	1,025 to 1,850	25
	Advanced	9 to 75	218 to 1,868	200 to 1,850	

Specifications

Type	Standard type		
Models	SFL14-□	SFL20-□	SFL30-□
Sensing type	Through-beam		
Light source	Infrared LED (855 nm)		
Effective aperture angle (EAA)	Within ± 2.5 ° when the sensing distance is greater than 3 m for both emitter and receiver.		
Sensing distance	Short - Long mode (setting switch)		
Short mode	0.2 to 5 m	0.2 to 8 m	0.2 to 8 m
Long mode	0.2 to 10 m	0.2 to 15 m	0.2 to 15 m
Detection capability	Ø 14 mm (finger)	Ø 20 mm (hand)	Ø 30 mm (hand-body)
Detection object	Opaque object		
Number of optical axes 01)	15 to 111	12 to 68	42 to 75
Protective height	144 to 1,008 mm	183 to 1,023 mm	1,043 to 1,868 mm
Optical axis pitch	9 mm	15 mm	25 mm
Series connection	Max. 3 SET (≤ 300 optical axes)		

01) It may differ depending on the models. For more information, see the "SFL/SFLA User Manual".

Type	Advanced type		
Models	SFLA14-□	SFLA20-□	SFLA30-□
Sensing type	Through-beam		
Light source	Infrared LED (855 nm)		
Effective aperture angle (EAA)	Within ± 2.5 ° when the sensing distance is greater than 3 m for both emitter and receiver.		
Sensing distance	Short - Long mode (setting switch or atLightCurtain)		
Short mode	0.2 to 5 m	0.2 to 8 m	0.2 to 8 m
Long mode	0.2 to 10 m	0.2 to 15 m	0.2 to 15 m
Detection capability	Ø 14 mm (finger)	Ø 20 mm (hand)	Ø 30 mm (hand-body)
Detection object	Opaque object		
Number of optical axes 01)	15 to 199	12 to 124	9 to 75
Protective height	144 to 1,800 mm	183 to 1,863 mm	218 to 1,868 mm
Optical axis pitch	9 mm	15 mm	25 mm
Series connection	Max. 4 SET (≤ 400 optical axes)		

Power supply	24 VDC≒± 20 % (Ripple P-P: ≤ 10 %)
Current consumption 01)	Emitter: ≤ 106 mA, receiver: ≤ 181 mA
Response time 01)	T _{OFF} (ON → OFF): ≤ 32.3 ms, T _{ON} (OFF → ON): ≤ 76.6 ms
Safety related output : OSSD output	NPN or PNP open collector Load voltage 02): ON - 24 VDC≒ (except for the residual voltage), OFF - 0 VDC≒, Load current 03): ≤ 300 mA, Residual voltage 04): ≤ 2 VDC≒ (except for voltage drop due to wiring), Load capability: ≤ 2.2 μF, Leakage current: ≤ 2.0 mA, Wire resistance of load: ≤ 2.7 Ω
Auxiliary output (AUX 1/2) 05)	NPN or PNP open collector Load voltage: ≤ 24 VDC≒, Load current: ≤ 100 mA, Residual voltage: ≤ 2 VDC≒ (except for voltage drop due to wiring)
Lamp output (LAMP 1/2) 05)	NPN or PNP open collector Load voltage: ≤ 24 VDC≒, Load current: ≤ 300 mA, Residual voltage: ≤ 2 VDC≒ (except for voltage drop due to wiring), Incandescent lamp: 24 VDC≒ / 3 to 7 W, LED lamp: Load current ≤ 10 to 300 mA (VF: ≤ 1.5 VDC≒)
External input	Reset input, mute 1/2 input, EDM, external test When setting NPN output ON: 0 - 3 VDC≒, OFF: 9 - 24 VDC≒ or open, short-circuit current: ≤ 3 mA When setting PNP output ON: 9 - 24 VDC≒, OFF: 0 - 3 VDC≒ or open, short-circuit current: ≤ 3 mA
Protection circuit	Reverse power polarity, reverse output polarity, output short-circuit over-current protection
Safety-related functions	Interlock (reset hold), external device monitoring (EDM), muting/override, Blanking (fixed blanking, floating blanking), reduced resolution
General functions	Self-test, alarm for reduction of incident light level, mutual interference prevention
Others functions	Change of sensing distance, switching to NPN or PNP, external test (light emission stops), auxiliary output (AUX 1, 2), lamp output (LAMP1, 2)
Synchronization type	Timing method by RS485 synchronous line
Insulation resistance	≥ 20MQ (at 500 VDC≒ megger)
Noise immunity	± 240 VDC≒ the square wave noise (pulse width: 1μs) by the noise simulation
Dielectric strength	1,000 VAC~ 50/60 Hz for 1 minute
Vibration	0.7 mm double amplitude at frequency of 10 to 55Hz (for 1 min), 20 sweeps in each X, Y, Z direction
Shock	100 m/s ² (≈ 10 G), pulse width 16 ms in each X, Y, Z direction for 1,000 times
Ambient illumination (receiver)	Incandescent lamp: ≤ 3,000 lx, sunlight: ≤ 10,000 lx
Ambient temperature	-10 to 55 °C, storage: -20 to 70 °C (no freezing or condensation)
Ambient humidity	35 to 85 %RH, storage: 35 to 95 %RH (no freezing or condensation)
Protection rating 06)	IP65, IP67 (IEC standard), IP67G (JEM Standard), IP69K (DIN standard)
Material	Case: Aluminum, Front cover and sensing part: Polymethyl methacrylate, End cap: polycarbonate, Power I/O cable and connector cable: polyurethane (PUR) or polyvinyl chloride (PVC), Y type connector cable: polyvinyl chloride (PVC), lamp output cable and series connector cable: polyurethane (PUR)
Approval	    (industrial robot protection device) 07)
International standards	UL 508, CSA C22.2 No. 14, ISO 13849-1 (PL e, Cat. 4), ISO 13849-2 (PL e, Cat. 4), UL 61496-1 (Type 4, ESPE), UL 61496-2 (Type 4, AOPDs), IEC/EN 61496-1 (Type 4, ESPE), IEC/EN 61496-2 (Type 4, AOPDs), IEC/EN 61508-1~7 (SIL 3), IEC/EN 62061 (SIL CL 3)

01) It may differ depending on the models. For more information, refer to the "SFL/SFLA User Manual."
02) The values of load voltage were drawn with PNP output, and in case of NPN output, apply these in reverse.
03) Be sure that the load current should be greater than 6 mA.
04) The residual voltage was drawn with 300 mA of load current.
05) It is the non-safety output. Do not use it for safety purposes.
06) Approved certification protection ratings are IP65 and IP67.
07) Refer to the "SFL/SFLA User Manual" for certified by model. The certified models for S-mark and KCs (industrial robot protection device) have the same functional basis.

Opening a New Era of Safety

Safety Door Switches

SFD Series

The SFD series safety door switches can detect opening and closing of doors in machines. The head can be rotated to change the insert direction of the operation key from 5 directions, with 6 available operation key types. Also, the door switches are available in terminal type and connector type models, making it easier for installation in diverse application settings.

Safety Standards

- IEC/EN 60947-5-1
- EN ISO 14119
- GB/T 14048.5

Certifications

Various Models Available for Flexible Installation

The SFD series door switches are available in terminal type and connector types for easy application and installation in diverse environments.

1. Head Rotation & 6 Operation Key Types

The SFD series offers diverse installation methods for flexible installation. The head can be rotated to change the insert direction of operation keys.

6 Operation Key Types

2. Two Model Types

Connector type and terminal type models are available for application in various environments. Both types can be detached easily from the body, for easier installation and maintenance.

Connector Type

Terminal Type

Slim and Compact Size

The door switches are slim and compact in size (H 92 x D 30 mm), allowing installation in tight or limited spaces.

Switches with up to 3 Contacts

2-contact or 3-contact switches are built in, with 4 types of contact configurations for easier application in any environment.

Ensuring Stable and
Reliable Safety

Safety Non-Contact Door Switches

SFN Series

The SFN series safety non-contact door switches utilize magnetic type detection to monitor opening and closing of doors. The dedicated controller allows multiple connection of up to 30 units. The switches can be installed vertically or horizontally, and can also be installed from both sides which allow application in various types of doors.

Safety Standards

IEC/EN 60947-5-3
IEC/EN 61000-6-2/4
EN ISO 14119

Certifications

Easy Expansion

Up to 30 SFN series units can be connected to a single dedicated controller, and various connection types and connectors are available for easy expansion.

1. Connect Up to 30 Units

Connect up to 30 units to a single dedicated controller to save cost and installation time.

2. Two Connection Types

Users can select between cable type and cable connector type models depending on user requirements.

3. Various Connectors

The cable connector type models can be connected to various connectors and extension cables for flexible installation and maintenance.

Flexible Installation

The units can be installed in right/left, front/rear, and top/bottom directions, allowing flexible installation in various door types.

Sliding Door

Swinging Door

Removable Cover Doors

Operation Indicator

The U-shaped operation indicator allows users to identify operation status from various directions.

IP67 Protection Rating

IP67 protection structure allows stable and error-free operation even in wet or dusty environments.

Mesh Contact with Sliding Structure

SF2ER series uses mesh contacts to increase contact points. The sliding structure removes oxide layers while making contact, allowing prolonged use without contact deterioration.

Nameplates

Mesh contact structure

Easy Terminal Connection

The switches are compatible with both O type and Y type terminals. The bolt plate ensures that the connection is made properly at a fixed position.

Bolt plate for fixed position

Various Accessories (Sold Separately)

Various accessories are available, including guard rings, nameplates, and radial support.

Flexible System Configuration

Key Selector Switches

SF2KR Series

The SF2KR series safety key selector switches are installed in safety fences or industrial equipment doors to control operation of machines, offering additional safety during maintenance in potentially dangerous environments.

Safety Standards

IEC/EN 60947-5-1

GB/T 14048.5

Certifications

Ensure Additional Safety with Shared Key

The same key can be used with other key selector switches within or outside the fence, offering additional safety. Operators can enter potentially dangerous areas while possessing the key, preventing key loss or entrapment within the hazardous area.

240 Different Models Available

The switches are available in various models including 4 types of key release direction, 3 types of N.C. contact powered location, and 10 types of keys depending on the general/lockable models for diverse applications.

Key lock function	Key free location	N.C. contact powered location	Lock location	Contact block	Key

1. Slim Space-Saving Design

The slim space-saving design (minimum width 17.5 mm) allows flexible installation in tight or limited spaces.

2. Operation Indicators

Users can easily check various operation and connection status with the operation indicators.

3. Front Terminal Design

Socket type terminal is located on the front for easy wiring and maintenance.

4. 16-Level Time Setting

The OFF-delay output models allow up to 16 different OFF-delay time settings.

* Available models : 0 to 3 s / 0 to 30 s / 0 to 300 s

Safety-Oriented Product Design

The SFC series utilizes force guided contact relays to protect from contact welding and ventilation holes are present to reduce heating.

5. Flexible OFF-Delay Output

On high performance units (SFC-A) and non-contact door switch units (SFC-N), users can set to 1 instantaneous output and 4 OFF-delay outputs using the DIP switch (default: 3 instantaneous, 2 OFF-delay). Auxiliary output is also available to check various error status.

* 4 safety outputs are available on standard unit controllers.

6. Expansion Relay Unit

The expansion relay units (SFC-ER) can be connected to high performance units (SFC-A) and non-contact door switch units (SFC-N) to increase the number of relay type safety output. (Connect up to 5 expansion relay units per 1 controller)

7. Up to 20 Logic Inputs

The SFC series can be expanded up to 20 units using logic input offering wider control of safety devices. Safer operation is possible with multiple logic connections.

1. Safety Circuit Design

TUV SIL certified force guided contact relays are used to detect failures including contact welding and circuit damage.

* Contact welding: welding of contacts due to high inrush current or overload.

2. Ventilation Holes

Ventilation holes are located on the top and bottom of the product to reduce heating.

05) Except operation time of advanced unit, non-contact door switch unit

Pollution	3
Overvoltage category	III
Dielectric strength	Basic / Advanced / Non-contact door switch unit: 500 VAC~ 50/60 Hz for 1 min. (between all terminals and case) Expansion relay / relay unit: 1,500 VAC~ 50/60 Hz for 1 min. (between all terminals and case) 2,500VAC~ 50/60Hz, for 1 min. (between input terminals and output terminals)
Insulation resistance	≥ 100 MΩ (500 VDC≒ megger)
Vibration ⁰¹⁾	0.75 mm amplitude at frequency of 10 to 55 Hz (for 1 min) in each X, Y, Z direction for 1 hour
Vibration (malfunc.) ⁰¹⁾	0.5 mm amplitude at frequency of 10 to 55 Hz (for 1 min) in each X, Y, Z direction for 10 minutes
Shock ⁰¹⁾	300 m/s ² (≈ 30 G) in each X, Y, Z direction for 3 times
Shock (malfunc.) ⁰¹⁾	100 m/s ² (≈ 10 G) in each X, Y, Z direction for 3 times
Protection structure	IP20
Ambient temperature	-10 to 55 °C, storage: -25 to 65 °C (rated at no freezing or condensation)
Ambient humidity	25 to 85 %RH, storage: 25 to 85 %RH (rated at no freezing or condensation)

01) This data based on the product is mounted with bolts. When installing DIN rail, use the product in an environment with small vibration(condition: less than 0.4 mm double amplitude).

SAFETY.

SAFETY is the safety product brand of Autonics that protects workers from the risk of accidents in industry sites. In the brand design concept, the meaning of this safety protection is visualized using a square as a basic element.

Autonics

Products

Sensors, Controllers, Motion Devices, Safety, Measuring Equipment, Connection Equipment and more

- Safety Light Curtains • Safety Switches • Safety Controllers • Vision Sensors • LiDAR • Displacement Sensors
- Photoelectric Sensors • Photomicro Sensors • Fiber Optic Sensors • Door Sensors • Area Sensors • Proximity Sensors • Pressure Sensors
- Rotary Encoders • Temperature Controllers • Solid State Relays • Power Controllers • Counters • Timers
- Digital Panel Meters • Digital Display Units • Sensor Controllers • SMPS • Industrial PC • HMIs • Recorders • Indicators • Network Converters
- Closed Loop Stepper Motor System (Ai-SERVO) • 5-Phase Stepper Motor & Drivers • 2-Phase Stepper Motor Drivers
- Motion Controllers • Industrial Networking • I/O Terminal Blocks • Distribution Boxes • Cables
- Control Switches/Pilot Lights/Buzzers • Pressure Transmitters • Temperature Transmitters • Software
